Starting this week, DOCS is now opening up drive through testing at our centers. Patients who have been exposed to a COVID19-potitive person or is experiencing COVID19-like symptoms will be able to contact us through our website at **https://docsmedicalgroup.com/telemedicine/**.

They will then be scheduled for a televisit to go over the process and review of symptoms. Then they will be asked to come to the center that day between 11AM and 2PM. Upon arrival they will asked for identification and then tested without having to leave their car.

These testing locations are being run in conjunction with the Emergency Preparedness response teams of the specific towns.

We will be holding these testing events as needed and expand to other locations as needed.

**Our next scheduled testing events are**:
Friday, March 27th in Waterbury
Friday. March 27th in Fairfield
Tuesday, March 31st in Stamford
Other dates will be announced shortly.

Also we are fully operational at our 17 locations and also providing telemedicine services 7 days a week. All locations have the capability to test for COVID19 outside of our drive through events as well.
