

COVID-19 ANTI-BODIES TEST NOW AVAILABLE

ANY LAB TEST NOW is offering the COVID-19 Anti-Bodies blood test by appointment only. This Quest Diagnostics IGG blood test could indicate past exposure and immunity to the SARS-COV-2 (covid-19) infection. The IGG test can produce detectable results within 10-21 days after being exposed to the virus. Quest Diagnostics is one of the largest and most experienced labs researching this important testing. Our local physician, Dr. Mark Schroer, MD provides the standing order which allows anyone to request a certified blood test. Dr. Schroer and our corporate medical officers feel confident that Quest Diagnostics produces a safe and accurate result.

Our labs will start scheduling daily 15 minute appointments between 9-10am on Monday, May 11th. For your safety, our lab door will remain locked during this time period allowing only scheduled patients/customers to enter. Our certified Medical Assistants/Phlebotomists will be dressed in CDC required PPE attire for your safety and theirs. The following procedures will be required when you enter our lab:

- **You must be free of any flu-like symptoms including fever, cough, sneezing, runny nose, etc.**
- You must please wear a mask.
- You must fill out the registration and consent form.
- You must be well hydrated for your blood draw.
- Test price = \$139; results sent in 2-4 days.

Call one of our Cincinnati locations to schedule your test.
