

COVID Newsletter Update

January 15, 2021

Dear Students, Families, Faculty and Staff,

This is a reminder that all positive COVID cases and assumed positive COVID cases must be reported to Trinity High School. This information needs to be collected for our data required by the CDC and the Cook County Health Department. If you did not report your positive COVID case from over Christmas Break or during the Adaptive Pause, please contact Rachel Meiner (contact information listed below).

As Trinity resumes to in-person learning on 1/25/21, we wanted to update you on our current COVID data. Here is Trinity's current permanent in-person data:

Current Positive Cases	Positive Cases: Block 2	Positive Cases: Block 1	2020-2021 Total Positive Cases
1	18	5	23

*Additionally, five permanent eLearners have reported a positive status but have had no contact with the Trinity community.

Here are reminders of our quarantine directives:

- If anyone in the Trinity community becomes positive or is presumed positive, or has any exposure to someone who is positive or is presumed positive, **it is imperative they do not come to school and that their parent/guardian notifies Trinity immediately to discuss the quarantine period (14 days).**
- Any community members who are experiencing any COVID-related symptoms (see your Appian symptom tracker questionnaire) but have not had any known exposure **must stay home until they are symptom-free for 24 hours.**
- Anyone experiencing COVID-related symptoms that persist longer than 24 hours, or who have symptoms and a possible exposure, **should not return to Trinity, should seek medical attention, and should continue to communicate their status to Trinity High School.**
- COVID-related inquiries can be sent to attendance@trinityhs.org or by calling our main line at 708-771-8383.

Stay well,

Mrs. Rachel Meiner
COVID-19 Data Coordinator
