

## ABOUT CERTI-FIRE TRAINING

The Electrical Contractors Association of Ontario (ECAO) along with the International Brotherhood of Electrical Workers Construction Council of Ontario (IBEW CCO) is offering a limited-time opportunity of **FREE Certi-Fire Fire Alarm & Protection Certification Tuition** for individuals who would like to take the courses through distant learning format.

Certi-Fire is a program, recognized by the Ontario Fire Marshal, that certifies licensed electricians to install, test, verify, and maintain fire alarm systems. Certi-Fire electricians meet standards set out under the Ontario Electrical Safety Code, Ontario Building Code, Ontario Fire Code, and Underwriters Laboratories of Canada.

The Certi-Fire program has four levels of training and a recertification is mandatory every five years to stay current. The offer of free tuition allows those who have already completed one of the 4 Levels to progress to the next, and is open to those interested in getting started at Level 1, as well as those who are about to renew their credentials for Level 5.

This one time **free training is being sponsored under the Provincial Skills Development Fund with Employment Ontario**. Certi-Fire is supported by the Joint Electrical Promotion Plan (JEPP), which is managed and funded by the Electrical Contractors Association of Ontario (ECAO) together with the International Brotherhood of Electrical Workers Construction Council of Ontario (IBEW CCO).

**Certi-Fire**

**FREE**  
Certi-Fire Training Tuition

Limited-time offer  
for individuals!

Professional training and certification approved by the Ontario Fire Marshal

## COURSE OVERVIEW

**Level 1:** Conventional Fire Alarm Control Panels & Installation of Input & Output Devices

**Level 2:** Integrated Fire Alarm Control EVAC Systems & Fire Alarm Extinguishing Control Panels

**Level 3:** Troubleshooting of Complete Fire Alarm Systems

**Level 4:** Advanced Fire Alarm Control Panel: Addressable Digital & Analog Devices

**Level 5 (Recertification):** Update Codes, Standards and Technology

Each level, except Level 5, is a mix of virtual classroom and hands-on shop times, equal to about 40 hours (160 hours to complete all 4 levels). Training is conducted by experts in the field of fire alarm installation and maintenance.
