

Friday Scientific Sessions  
January 13, 2023

**Foot Surgery: Selected Topics on Philosophy, Decision Making, and Technique**

7:00am-7:30am

Michelangelo or DaVinci? Is surgery an art or science? Decision making is more than an algorithm  
Allen Jacobs, DPM

7:30am-8:00am

The technologic imperative and foot surgery: who determines what you do and how you do it?  
Allen Jacobs, DPM

8:00am-8:30am

The ageing podiatrist: when is it time to retire from surgery?  
Allen Jacobs, DPM

8:30am-9:00am

When and how to say no to a patient: you might just sleep better  
Allen Jacobs, DPM

9:00am-9:30am

A Discussion of the Concept of Unnecessary and Discretionary Surgery  
Allen Jacobs, DPM

9:30am-10:00am

Considerations in the management of juvenile bunion surgery:  
Allen Jacobs, DPM

10:00am-10:30am

Break

**Selected topics of interest on neurologic problems of the foot and ankle**

10:30am-11:00am

Spinal stenosis and the podiatric patient: what you should know, what you should be doing  
Allen Jacobs, DPM

11:00am-11:30am

Morton's neuroma in 2023; a review of recent literature and current recommendations  
Allen Jacobs, DPM

11:30am-12:00pm

The evaluation and treatment of neuropathy in the older patient  
Allen Jacobs, DPM

12:00pm-1:00pm

Lunch and Learn: NON-CME

Ebm pharmacy  
Improving patient care and office revenues

### **Biomechanics**

1:00pm-1:30pm

Principles for the orthotic management of plantar fasciitis

Allen Jacobs, DPM

1:30pm-2:00pm

Gait abnormalities in the ageing patient

Allen Jacobs, DPM

### **Primary Care Podiatry**

2:00pm-2:30pm

Iwgdf guidelines for the management of diabetic foot ulceration: facts, not fantasies in ulcer care

Allen Jacobs, DPM

2:30pm-3:00pm

Osteomyelitis and oral antibiotics: yes you can, how you can

Allen Jacobs, DPM

3:00pm-3:30pm

Dvt prophylaxis in the treatment of commonly encountered foot and ankle problems: situational determinations recommendations and guidelines are conflicting

Allen Jacobs, DPM

3: 30pm-4:00pm

Changing views on the management of dry gangrene: benign neglect may not be the answer

Allen Jacobs, DPM

4:00pm-4:30pm

How to incorporate treatment of venous disorders in primary care podiatry: it's time to get involved

Allen Jacobs, DPM

4:30pm-5:00pm

Plantar fibromatosis: keys to successful non-operative and surgical management

Allen Jacobs, DPM

5:00pm-5:30pm

So, you want to be an expert witness? Its more than just showing up and talking

Allen Jacobs, DPM

Saturday Scientific Sessions  
January 14, 2023

**From toenail to total care in treating the diabetic patient: expanding patient care in primary care podiatry and being a doctor again. How to evaluate, how to document, how to code.**

7:00am-7:30am

General principles: office management of the patient with diabetes is more than “at risk care”

Allen Jacobs, DPM

7:30am-8:00am

Using the 24, 25 modifiers for e and m services with at risk foot care

Allen Jacobs, DPM

Michael Warshaw, DPM

8:00am-9:00am

Skin disorders in the patient with diabetes: Review of disorders, diagnosis, treatment options

Documentation for the 24, 25 modifiers

Coding and billing considerations

Allen Jacobs, DPM

Michael Warshaw, DPM

9:00am-9:30am

Toe web space infections should be aggressively treated: Review of differential diagnosis

Review of documentation necessary

Coding and billing considerations

Allen Jacobs, DPM

Michael Warshaw, DPM

9:30am-10:00am

Heel fissures: Review of common etiologies and treatment

Review of necessary documentation

Coding and billing considerations

Allen Jacobs, DPM

Michael Warshaw, DPM

10:00am-10:30am

Break

10:30am-11:30am

Autonomic neuropathy: recognition and office management of pedal manifestations

Review of autonomic neuropathy manifestations

Coding and billing considerations

Allen Jacobs, DPM

Michael Warshaw, DPM

11:30am-12:30pm

Sensory neuropathy in the diabetic patient: principles and practice of office management

Review of diagnostic principles  
Review of documentation required  
Coding and billing considerations

Allen Jacobs, DPM  
Michael Warshaw, DPM

12:30pm-1:30pm

Lunch and learn: non-cme

Ebm pharmacy: providing better patient care and increasing office revenues part 1

1:30pm-2:30pm

Motor neuropathy in the diabetic patient

Manifestations and detection of diabetic motor neuropathy in the office

Required documentation

Coding and billing considerations

Allen Jacobs, DPM  
Michael Warshaw, DPM

2:30pm-3:30pm

Office management of pad in primary care podiatry practice for the podiatric physician

Therapeutic approaches for the podiatric physician

Documentation requirements

Allen Jacobs, DPM  
Michael Warshaw, DPM

3:30pm-4:30pm

Ulcer management in the office: documentation considerations are critical

Allen Jacobs, DPM  
Michael Warshaw, DPM

4:30pm-5:30pm

Process not product driven therapies in the office management of diabetic foot ulceration

Therapeutic considerations and applications

Documentation requirements

Coding considerations in ulcer management

Allen Jacobs, DPM  
Michael Warshaw, DPM

5:30pm-6:15pm

Update on cpt/icd-10 coding for ulceration management

Michael Warshaw, DPM

6:15pm-7:15pm

Ebm pharmacy: non-cme.

Providing better patient care and increasing office revenues part 2
