

07.22.2022

Dear Parents,

This week for our STEM activity we did the Automobile Engineer. It is similar to the theme park box we did in the beginning of the year. It involved the Omega Family and the children Ty and Karlie who love to help and build in their community. The students build a minivan, crane truck, racecar, fire truck, and forklift. The students love to play with their creation afterwards. Next week we will complete the automobile engineer.

Our art theme is musical instruments. Students learned about the egg shaker, hand drum, and the rain stick. They made an egg shaker using old easter eggs. The hand drum was made with two bowls, a popsicle stick, and beads. Finally, the rain stick was made with empty paper rolls and construction paper to decorate.

Some of the books we read was 'Shark Who Was Afraid of Everything,' 'What Time is it Mr. Crocodile,' and 'Alligator Baby.'

We hope you have a great weekend,  
Ms. Adriana and Ms. Sammy
