

07/23/2021

Hello Parents of Silver Door,

This week we continued our travels in South America. We learned all about the country Chile. Chile's flag is red, white, and blue. The color red stands for the bloodshed by soldiers, the white stands for the snow on mountains, and the blue is the sky. The climate of Chile is so unique because there is hot and cold climate. The children learned that llamas and flamingos are popular animals found in Chile. They also learned all about foods that are popular like tamales, empanadas, ceviche, and more.

This week's STEM activity was Parachute to Safety. Silver Door 2 built pad bites and tested how they fell, how fast, and if the people stayed in the basket. Silver Door 1 continued the automobile engineer by building an ice cream truck, a school bus, a tractor, and a motorcycle.

Some stories we read this week were "The Little Penguin," "Kiss Me, I'm Perfect," and "Hiccupatomus."

The children really enjoy the educational games that they get to play daily on the tablets.

We hope you have a lovely weekend,

Ms. Adriana and Ms. Sammy
