Dear Parents of Blue Door,

Hi! This week we talked about Spring and how the weather becomes warm and the flowers and trees start growing. Also, we talked about the different species we will see like the butterfly, bees, squirrels, flies, chipmunks, and deers. The children were also shown pictures of these animals.

During Circle Time, the teacher also went over the colors and shapes. We have been practicing our fine motor skills a lot. Play-Doh, puzzles, coloring, cutting with scissors, building with blocks and Legos, brushing our teeth, and lacing are great for helping our fine motor skills.

For art, the paper plate and fingertip spring flower came out very cute. The children painted a small paper plate and then used their fingertips to fill in the flower in the middle. They had a great time dipping their fingertips in paint and then onto their flower. The children were given a cloud to glue on construction paper and the raindrops were made by using their fingertips once again. This art project came out really nice and most importantly they had a nice time doing it. The children colored raindrops and then added the eyes to it and a happy smile. Using dot.a.dot they decorated a flower shape and then glued a craft stick to represent the stem.

Parents, please remember we are closed on Friday. Please wash your child's blanket to be returned to school on Monday. Make sure your child's nails are cut short, so that way they do not scratch themselves or their friends. We would like to wish everyone a HAPPY EASTER. Enjoy time with your family.

"The soul is healed by being with children" by: Fyodor Dostoevsky.

Have a nice long weekend,

Mrs. Cindy  
Mrs. Miriam
