

Dear Parents of Blue Door,

Hello! this week we learned about colors and shapes. During Circle Time the teacher talked about all the different things in class and the colors they were. Also, The teacher dumped legos on the table and asked each child to pick out the color she asked for. The children were also asked to go around the classroom and look for certain colors. They had a great time.

For art, the children made a caterpillar using green and yellow circles. As they were gluing their circles to the construction paper they were asked what color each circle was. The triangle collage was lots of fun as well, in this art activity we talked about big and small. Some of the triangles were different colors as well. The ice cream craft stick art activity was fun and filled with lots of learning as well. The teacher put out on the table all different colors in the shape of an ice cream. The children were asked to pick out the color asked for by the teacher and once they picked out the correct color ice cream shape they were able to glue it onto a popsicle stick. In their journals they colored a circle and triangle and made a circle collage also in their journals.

Parents, please work with your child at home as well. Reinforcement is very important. Please go over the colors red, orange, yellow, green, blue, brown, black, pink and white. Please, please help your child in learning on how to hold a pencil or crayon correctly. The more help they get, they will learn faster.

Wash your child's blanket and return it to school nice and clean to school on Monday.
