

09/02/2022

Dear Parents,

During this week the children had fun learning about things that we see in the sky and some of their properties. We discussed why the star, the sun, is good and bad for us, and why it looks different than other stars. We discussed the phases of the moon and we covered vocabulary such as gravity, rotation, stars, sun, moon, motion, etc.

The children did great on their first Math test, way to go! We introduced subtraction using drawings and manipulatives.

We have been talking about the present and the past during Social Studies. We learned some facts about life then and compared it with today's way of living. We also learned what a timeline is.

We covered rhyming words, syllables, sound-out words, and letters J, U, K, X, and G during this week. We continue to review that writing is done left to right and top to bottom, the importance of space in between, and the proper formation of our letters!

SPECIAL EVENT:

We celebrated Maximiliano's 6th Birthday 🎂, thank you for sharing this special moment with us!!!

COMING UP:

Kids for Kids will be closed on Monday the 5th to observe Labor Day.

Science test on Wednesday the 7th

Social Studies test on Thursday the 8th

Spelling and High Frequency words' test on Friday the 9th

Wishing you all a fantastic long weekend!

Love,

Ms. Audrey 🌸
