Dear Parents of Gold and Orange Door,

This week we continued our journey and traveling to Europe. In Europe we traveled to Italy, learning about the culture, traditional places, and significant landmarks. The children made their own pizza, learned about the Colosseum and the Leaning Tower of Pisa.

For STEM this week, the students used Lego Simple Machines to create different structures and machines. The students were able to be hands-on and work as a group as well as independently to use their critical thinking skills to complete the daily activity.

In Orange Door and Gold Door, the students read two stories every day during story time, being able to interact with and ask questions about the story as a whole group and practice their critical thinking skills. The older students read chapter books during story time at their own pace.

During tablet time this week, the children were able to use educational websites and games such as Starfall, Coolmathgames, and interactive puzzles. The students love playing chess on the tablets as well as exploring different apps.

Parents, please send a water bottle for your child daily as it is very hot outside during soccer and playground time. Also, feel free to send an extra mask in case the one your child brings gets wet or sweaty.

As always, have a nice weekend!

Ms. Karla & Ms. Jocelyn
