

01/08/2021

Dear Parents,

A happy new year and welcome back!

In language arts and reading we began with Unit 5. In this unit, we will be learning about living things. Our vocabulary words were plant, require, soak, crowd, and harmful. Our story of the week was "My Garden." It was about a little girl that imagines a silly garden. The children also learned about poems. They illustrated a flower or tree and completed the poem format. This week our letter of the week was H. All of our spelling words began with the H sound. Our sight word was my. It was found in the class story we read. We also learned that we can replace a noun by using a pronoun. For example, instead of girl we can say she. Next week we will continue with Unit 5.

In math, we began with Chapter 6. This chapter will be about subtraction. In this chapter, we reviewed taking from a group and taking apart a number. We also learned how to act out subtraction problems using images. The week ended with modeling and drawing subtraction problems and creating their own problems.

In science we learned all about the sun, moon, and stars. We started with reading and learning facts about the sun. A fact we learned is that the sun is made of gas and people can't visit the sun. A fact we learned about the moon is that the moon is the 5th largest moon in the galaxy. The children created a sun book and a moon book. Next week we will learn about seasons and the weather in each season.

Have a wonderful weekend,
Ms. Adriana and Ms. Vanessa
