

07.14.2023

Dear Parents,

During this week the children enjoyed the Jungle Bus, playing games during P.E time, reading time, math, building and creating, and music with Mrs. Michelle!

The planned ARt AcTivity was about making papier mache, the students made a bowl out of it. They painted it and some children added decorations. It was messy but fun! The ingredients used were water, flour, and salt; the students also used tempera paints and other crafts.

During math, the children are encouraged to ask questions as needed and to go at their own pace. The younger children are assisted by an older peer at times.

The students read "Flat Stanley Show and Tell. They discussed the problem, the solution, and new vocabulary words.

The students seemed to be loving the game "Uno" I hear them giggling every time they play. Other students prefer to build with Legos or create something on their own.

Some children continue to enjoy extracurricular activities such as ballet and karate.

COMING UP...

Sensory Play/Storytime Field Trip on Tuesday the 18th!!!

I wish you all have a fantastic weekend!

Love,

Mrs. Audrey 😊
