Hello Parents of Rainbow Door!

This week was out of this world quite literally, we learned even more about space, the sun, the moon and more specifically the planets. We learned the names of the planets in our solar system as well as their color, what they look like and even their size. The children shared with us which one of the planets were their favorite. Some of those include Mars, Venus and Pluto. We played Simon says do the opposite and we reviewed our months of the year and days of the week. Parent's, Mrs. Miriam and Ms. Karla would both like to thank you for your beautiful contributions to our teachers appreciation luncheon. We truly felt appreciated by all of you.

For art, the children worked on making the planets. Every day they chose a planet to make either using do.a.dot markers or paint and a small plate. They would then use scissors to cut their planets out. At the end of the week the children enjoyed putting all their planets together into their very own solar system. The children also had time to work on their journals by adding their very own planet to it. They used markers and crayons and created what they would like for their planet to look like.

For storytime we read One Small Step, Pete the Cat Out of This World, Hello World the Solar System, A Place For Pluto, and I Am a Solar System.

Parents, please remember to continue practicing with your child at home and to help them hold their pencils properly which is an important motor function. Also, please wash all your child's blankets and return them to school Monday morning. Please label anything that is theirs with their name and remember to cut your child's nails so they don't scratch themselves or others.

Quote of the week:

When you look at the stars and the galaxy, you feel that you are not just from any particular piece of land, but from the solar system. -Kalpana Chawla

Have a wonderful weekend!

Mrs. Miriam

Ms. Karla
