

04.14.2022

Hello Parents of Silver Door,

I would like to say a HUGE thank you to all parents that came and helped us make our Spring Egg Hunt even more special this year. Also want to say a thank you to The Jungle Bus for coming and letting have so much fun on their bus for our field trip.

In Language Arts and Reading, our topic was how things are built. This week we learned that our structures like a houses and bridges are made of different materials such as wood, steel, or brick. Next, the students learned what prepositions, are and how to use them in a sentence. Then, they learned what are final stable syllables and we practiced writing them on our board. Lastly, our sound of the week was the diphthong oi and oy like in toy and soil.

In Math, we finished Chapter 10. This week the students learned how to combine 2D shapes to make a new one. Then, they learned how to combine 3D shapes to make new shapes. Lastly, they learned how to take apart 3D shapes and count their faces, edges, and vertices. Next week we will be doing the Chapter 10 test.

We did not do science this week, instead we did some spring activities such as decorating our bags for the egg hunt, decorating an egg and making a structure out of toothpicks and jellybeans. Next week we will be starting a new Science topic.

The beautiful thing about learning is that no one can take it away from you. – BB King

Have a wonderful long-weekend!!!

Ms. Sammy 🌸🌼
