

07.28.23

Hello Gold Door Parents,

It's hard to believe that we have just two weeks left of summer!! It has been so much fun!

This week was a rainy one, but we still enjoyed ourselves. Our STEM project was a continuation of the Automobile Engineering. We completed five builds that include Mocha the Motorcycle, Buggy the Buggy Truck, Harry the Harvester Tractor, Irene the Ice Cream Truck, and Schmoo the School Bus. Our favorite part is playing with them when we are done.

Some of the art projects we did this week was making an ice cream cone and a pizza using paper plates and paint. The older group did a jelly fish, bubble wands, and a coffee filter butterfly.

As always, we have loved playing with LEGO bricks, connecting cubes, Jenga, Dominoes, and Connect 4. Our reinforcement for kindergarten was working on the letters of the alphabet and writing our first and last name. First grade worked on sight words and short vowel sounds.

We hope you have a lovely weekend.

Ms. Adriana and Ms. Chariss
