

06/17/2022

Hello Parents of Gold Door 1 and 2,

We would like to welcome you to this year's summer camp. It will be filled with laughs and smiles. Our names are Ms. Audrey and Ms. Sammy. I, Ms. Audrey will be in Gold Back with the first graders, and for this week Ms. Sammy was in Gold Front with the older group.

For our STEM activity, this week the students did, "Create a Chain Reaction." The students set up ramps, pendulums, hammers, and so much more- then sent a ball racing down the track and into the goal. With this kit, the students got to learn all about gravity, motion, and force. The younger students loved doing the easy tracks, while the older kids loved the challenge of the more difficult tracks.

For our art activities, our main focus was all about Father's Day. The students loved talking about their dads and telling us their favorite food, color, sport, etc. We made a wooden plank with a special note on the back. Then we made cards. After that, the students loved doing free art and showing their teachers how creative they can be.

On Thursday, we had our first indoor field trip of the summer camp. People from the Miami Children's Museum came and sang some special songs while reading stories to the kids. They enjoyed singing along.

We can't wait to see what next week will bring!! Happy Father's Day!

Have an awesome weekend.

Ms. Audrey and Ms. Sammy
