Hello Orange Door Parents!

We had a fantastic week in Orange Door! This week the students learned about the Amazon Rainforest. "A rainforest is a tall, dense forest that receives lots of rain every year. Rainforests are full of biodiversity, meaning there are lots of different species of plants and animals that live there. There are two types of rainforests: tropical rainforests and temperate rainforests. The Amazon rainforest is the largest tropical rainforest in the world.

Art- The students made snakes using paper plates, Do-A-Dot Markers, scissors, glue, and google eyes. They made chameleons with watercolor paint, plates, scissors, glue, and sticker eyes. They made frogs using crayons, construction paper, glue, and plates. In addition, they made sloths with construction paper and google eyes.

Circle Time- The letter of the week was K. The students reviewed objects that begin with the letter, and we had them learn the best word that begins with k "kindness ". We try to teach them how important being kind to your friends and loved ones is. We reviewed the sounds of the alphabet, and our numbers 1 through 30.

Music and Movement-This week the music teacher told the students a story while using music and puppets. Soccer was a blast as usual, and Ms. Jackie let them play their favorite game, Sharks and Minnows.

Next week we will be going back to the Cretaceous period, and learning about Dinosaurs 🦖.

We hope you have a great weekend!

Ms. Miriam and Ms. Melanie
