

03.22.24

Dear Parents,

During this week, the students had lots of fun measuring objects around the class. They used non-standard tools to measure such as tiles and a piece of yarn. They also measured with a 12 inch ruler and a measuring tape. We discussed rulers, yard, inches, and feet. We will be finishing Chapter 8 after Spring break.

During language arts, we covered the genre of myths. We used strategies such as rereading and looking for text evidence to comprehend a story. The students used a web or graph to write their ideas before writing a story about a talking plant.

For social studies, we continue to talk about citizens, our government, and important documents. We learned about some very important Americans who made a difference in our country. For example, Cesar Chavez, George Washington, Rosa Parks, and Martin, Luther King, among others.

COMING UP...

Next week is a non-instructional week. Attendance is optional.

The school will be closed on Friday the 29th for Good Friday.

The math test will tentatively be on Tuesday the 2nd of April.

Wednesday, April 3rd is our egg hunt. If possible, bring a dozen eggs filled with non-candy items.

I wish all of you a wonderful, long weekend and a fantastic Spring break vacation if you decide to take this time off. Otherwise, I will see you next week.

Love,

Mrs. Audrey
