

4.29.2022

Hello Parents of Silver Door,

Reminder that are Muffins with Mom will be on Wednesday, May 4 from 8:00am-9:00am. Can't wait to see everyone!!

In Language Arts and Reading, our topic was people that help us. This week we listed everyone that helps us and what they do like our mom gives us hugs, a teacher teaches us learn, and a doctor makes us feel better. Next, the student learned what possessive pronouns are and how to use them in a sentence. Then, we not only learned what a thank you note is, we even got to write one to somebody who has done something for us. Lastly, our sound was the variant vowel o like in saw, and haul.

In Math, we continued working on Chapter 11. This week we continued with patterns. The students reviewed what a repeating pattern is and learned what a growing pattern is. For our activity, they got to make a pattern bracelet using different colored beads and string. Next week, we will be finishing this chapter.

In Science, we reviewed all of the habitats we learned. Then we did our habitat test. Everyone did very well. The last thing we did was present our habitat projects. They look soo good that they are on display for everyone to see. Next week we will not be doing Science so we can focus on Mother's Day and Social Studies.

Believe in yourself. You are braver than you think, more talented than you know, and capable of more than you imagine. – Roy T. Bennett

Have a great weekend!!

Ms. Sammy
