

07.21.2023

Dear Parents,

Ms. Chariss and I, Ms. Sammy, would like to say we had so much fun with your child this week.

For our STEM activity, the students had the opportunity to be engineers and build all kinds of different automobiles. We had to help Ty and Katie go through different missions in order to get to the grocery store for their parents. They got to work together as a team and build a minivan, a crane truck, a race car, a fire truck, and a forklift. The best part was at the end of each build because the students had a chance to test out their build to see if it would work.

Our theme for arts and crafts was: musical instruments. We reviewed all about instruments and what kinds of sounds they make. Then throughout the week, students got to make their very own instruments such as a maraca, a hand drum, and a rain stick.

For Reinforcement, students in Gold Door 1 reviewed on how to hold a pencil. Then they practiced writing their first and last name. In Gold Door 2, we reviewed how to read sight words and then write a sentence with them.

On Tuesday, we had an officer come to our classrooms to teach us about Stranger Danger. We learned that it is not safe to talk to someone we don't know.

Next week, Ms. Adriana will be back in Gold Door 2 and Ms. Chariss will be in Gold Door 1.

Hope everyone has a fantastic weekend!!!

Ms. Sammy and Ms. Chariss
