

12/17/2021

Dear Parents,

During this week we continued to work with the original story of Flat Stanley, we covered skills such as comprehending the text read, looking for evidence to support answers, sequence of events, comparing and contrasting, analyzing the characters, reading fluently and with intonation and main details among other skills. The students drew their own Stanley and they will be taking it home on Friday.

For math, we worked with graphing and word problems, these are skills that the children can practice at home as well; especially word problems. Understanding what to look for and what is being asked is important for the children to resolve math problems.

The students were very busy making ornaments for our Christmas tree, making and wrapping gifts, writing letters, singing, and having fun; besides their academics.

Other fun things this week: Santa's visit! Our Christmas Caroling, hot cocoa and, "The Polar Express," making a gingle necklace, wearing pjs to school and sharing about our holidays.

COMING UP...

Next week is a teacher planning week from Monday to Thursday. We will be closed on Friday, Christmas Eve. Please let me know if your child is taking the two weeks off for Winter break or if she/he will be attending next week (for lunch purposes). Thank you!

🎄 Thank you for your good wishes and thoughtful gifts. My Best Wishes to all of you during these festivities, keep it safe! ☆

Ms. Audrey📧
