

04.05.2024

Dear Parents of Rainbow Door:

We had a fantastic week in our class. The Spring egg hunt was wonderful. The children had tons of fun looking for eggs. Thank you parents for making this day a memorable one.

The topic for this week was Insects. During Circle Time, the children learned about some characteristics of insects, for example: They have three pairs of legs, the body of these small animals is divided into three parts, head, thorax, and abdomen, also that they are laborious. We learned about insects such as the Firefly, Ant, Dragonfly, and Caterpillar.

We continue practicing letters and numbers, and we are very happy with how the children have learned.

During art time, the children traced, colored, and cut out the dragonflies, they also decorated a garden with markers and crayons on construction paper and then glued the previously cut-out dragonflies. In addition, the children chose ants made of paper and glued them on a colored sheet simulating the grass. They also worked on the journal drawing their favorite insect. .

The topic for next week will be Insects, part two.

The student of the week will be Ethan Martinez. Please bring the poster next Monday.

Have a blessed weekend !!

Mrs. Miriam & Mrs. Mireya
