

06/24/2022

Hello, Parents of Silver Doors 1 and 2,

Well, we have officially completed the second week of summer camp. This week our theme was all about insects. The students talked about their favorite kinds of insects and where we can find them. We also talked about the different body parts of insects such as the antennae, wings, and legs.

For our Art Activities, we made a caterpillar, a ladybug, an ant, and a butterfly. Then we read stories like The Very Hungry Caterpillar, I See a Leaf, If You Take a Mouse to School, and If I Had a Dragon.

For our STEM activity this week we did Create-a-Chain-Reaction. The students had to set up ramps, pendulums, hammers, and much more-then sent a ball racing down the track and into the goal. Everyone worked together to find the pieces and put the whole track together, but our favorite part was when the ball reached the goal. We all yelled YESSSS!!!!

Lastly, we would like to say a huge thank you to the Jungle Gym Bus for coming here for our field trip on Monday. Their bus is so much fun!

Have an awesome weekend!!

Ms. Karla, Ms. Sammy, and Ms. Wanda
