

04.14.2022

Dear Parents,

During this week we reviewed poems and we compared them with Free Verse. The students practiced skills such as contractions, irregular verbs, apostrophes, and syllables. They also practiced some reading comprehension strategies such as visualizing what they read, asking themselves questions, looking for key details to find out the theme of a text; etc.

We finished and reviewed Chapter 7 for Math and the children took their test. Next week we will start talking about measurements :)

As we finished Chapter 8 in Science, and because this was a short week, I decided to focus more on Social Studies to then start a new chapter for Science next week. We've been talking and learning about the different Native Tribes in America; their beliefs and their kind of living.

REMINDERS...

Spelling/vocabulary test for this week will be provided on Monday morning.

I will introduce new words on Monday and the children will have a regular test that Friday.

It is imperative that children continue to come to school every day and early (unless they are sick); there is much more to learn and the students will be going on vacation soon!

Have a lovely long weekend!

Love,

Ms. Audrey 📧
