

06.14.24

Dear Parents,

We would like to welcome you to Summer Camp at Kids for Kids Academy. This was a marvelous first week filled with many fun moments and activities.

The students engaged in building and making a chain reaction by using trial and error. We discussed forces such as gravity, pull, and push. The students had lots of fun figuring out how to accomplish each daily goal and making their own structures after.

For the Arts, the students worked on making a special card and project for their daddies; some students decided to do something special for their moms :). They explored with cardstock, dry clay, acrylic paints, and Mod Podge.

During our enrichment time the students practiced skills needed in math and language arts. We will continue to work with the children so they don't forget what has been learned.

Quiet moments are also needed and fun, the students do 30 minutes of D.E.A.R Time, they drop everything and read!

The students also do free art, board games, dance, and movement. They seem to be having a blast, I know we are!

We look forward to another fantastic week. We may have a water play day in June...more information will be disseminated.

To all the daddies and the moms who are both (mom and dad)...Happy Father's Day! Embrace your children and enjoy what they made for you.

With love,

Mrs. Audrey, Second Grade

Mrs. Adriana, First Grade
