

Wholesale Planogram Program

Watts has developed several tools designed to help you more effectively merchandise and boost sales of Watts products at self-service locations.

- The Planogram maximizes shelf space for highest volume items, reducing time spent restocking.
- Products are merchandised by category, use, and size, making it easier for customers to find what they need.
- Schematic layout illustrates product placement and number of facings, making implementation easy.
- Product lists provide recommended selection and appropriate alternatives for a comprehensive product mix.
- Point of Purchase signage helps customers quickly locate appropriate Watts products by application.
