

iA Participating Life Insurance (iA PAR)

OVERVIEW OF THE PARTICIPATING ACCOUNT

PHILOSOPHY AND OBJECTIVE OF THE PARTICIPATING ACCOUNT

The management philosophy of the participating account is based on an understanding of the long-term risk/return relationship, and the resulting asset allocation opportunities.

The search for added value is part of an active management process based on asset and risk diversification. The participating account is actively managed to maximize potential returns while maintaining a conservative approach.

In order to optimize the risk/return relationship, investments in alternative assets will be integrated into the account in addition to fixed income securities and equities. Alternative assets offer various advantages such as higher returns with an equal or lower risk, low correlation with traditional asset classes and portfolio diversification. The alternative assets are the following: commercial mortgages, private debt, real estate investments and private equity and infrastructure.
