

# **Railroaders need:**

- **Safe staffing levels and safer working conditions.**
- **Quality of Life improvements with adequate time off.**
- **Paid Sick Days.**
- **Affordable Healthcare.**
- **Cost of Living Adjustments to keep up with inflation.**

Freight railroad workers are currently voting on the contract recommendations put forward by President Biden's Presidential Emergency Board. Railroad workers everywhere are frustrated with the PEB's recommendations, and we're raising the heat.

The Freight Railroads have abused us and the communities we serve for far too long. The railroad infrastructure is a ticking time bomb, and the lack of rail workers has made an unsafe situation even worse for the cities and towns that we run through.

We're not done yet! We'll keep struggling for justice until rail workers and our communities are safe. Stay tuned.
