

Sariena Corvid Continues:

In this role I am learning that there are many rules, regulations and procedures that keep the airport running smoothly and correctly. It takes a lot of people to oversee the functionality of the airport. I am so excited to be learning this new role because it allows me to explore the different avenues that aviation offers, that most people don't know about. I'm able to assist and be a part of many incredible experiences at the airport and network with so many different people. DEN is truly its own city and it's remarkable how much it takes to keep it running. My goal is to work this job and learn as much as I can about what the airport offers, all while I continue my flight training on the side. I would love to finish my Commercial Rating. I am currently paying back some debt from flying previously and am working on saving up to complete my commercial certificate. Thank you so much for the support! I am so grateful for being a part of the MHF Program. If it was not for the MHF Program, I would not be in aviation or be where I am today. I truly have found my passion working in aviation and I am very grateful for all of the different experiences that I received from the program."
