

## National Leaders Collaborate to Offer Scenario Planning on the Future of Human Services

To offer insights into what progress humans have made, what needs we will have and what human services will be in the United States in 2035, leading national human services organizations are offering a three-part webinar series to help public and private human services providers and community partners respond to and prepare for major uncertainties in the state of the economy and employment, technology, policy, equity and inclusion.

The Institute for Alternative Futures (IAF), funded by the Kresge Foundation, developed the [Human Progress and Human Services 2035 project](#), which considered alternate futures for the nation and with eight state and local areas. Now, IAF and Kresge are partnering with American Public Human Services Association (APHSA) and the Alliance for Strong Families and Communities to expand the reach and use of these scenarios through this webinar series.
