Plan Your Medicaid Modernization Journey

Presented by Microsoft, APHSA Strategic Industry Partner

June 24, 2025 | 1:00-2:00pm ET

PRESENTER BIOS:

Andy Pitman is a director on Microsoft's public sector team, helping state and local governments improve the efficiency and quality of their health and human service initiatives.

More specifically, Andy works with state and local governments to help them leverage AI and other IT solutions in their health and human services strategies around critical programs, such as Medicaid and disease management. In this role, Andy works with governments and partner companies to develop and implement AI innovations in areas such as case management, data analysis, cloud computing and devices. Previously at Microsoft, Andy led state and local government engagements for public safety, DMV, enterprise content management, digital archiving, voter registration and electronic identity. Prior to joining Microsoft in 2005, Andy spent almost 18 years at Accenture, where he served in a variety of roles, including leadership of Accenture's U.S. government Microsoft solutions team; project leader for many government projects, especially in human services; leader of eGovernment offerings, including Accenture's eGovernment Accelerator solution; and leader of Accenture's global field software organization. Andy holds an MBA from Tulane University and a BS degree from the University of Alabama.

Anthony Flot is currently the Chief Information Officer for the Arizona Health Care Cost Containment System (AHCCCS), Arizona's Medicaid agency. AHCCCS was Anthony's first entry into government, which he began in 2017 as the Information Technology Manager.

Prior to coming to work for AHCCCS, Anthony worked over 20 years in the financial services technology realm. He worked as a technician, an engineer, a lead, manager, and technical project manager. Anthony built his career on meeting business needs by making complex technology simple. He takes pride in getting to know the business and finding the technology that meets a need or improves on a current process.

In the technology field, much like in business, you must always be looking to improve and evolve. Anthony's passion for technology has always driven him to keep at the forefront of the industry and to apply that knowledge to meet business needs.
