PLANT OPERATIONS SUPPORT PACKAGES

What Kind of Help Do You Need?	HELPING HAND	VALUABLE RELIEF	INTENSIVE SUPPORT	TURN-KEY SUPPORT	SUPPORT PLUS	PLANT SUPERVISOR/MANAGER	PLANT SERVICE TECHNICIAN
	An extra pair of hands! Our Operator's Assistants have no guaranteed qualifications but do have some experience working on actual treatment plants. Note there must be a full Operator on-site.	An experienced Operator! We'll guarantee he has plenty of experience with treatment plants. These well-seasoned Operators put the "valuable" in "valuable relief".	Designed for those times when you need extra support in short, concentrated bursts. This package factors in extended work hours (minimum 10 hours per day) for 1-2 weeks, using an aggregate rate. You get one of our "Valuable Relief" Operators for those intense periods when you really need it.	A qualified Operator fully kitted out with dedicated vehicle and Engineering Support included! Available for a minimum commitment of one year, your Operator will live and be part of your community.	Want to build your own Package? Need an experienced Operator for more than a few weeks but less than a year? Need tools or testing equipment but not a vehicle? Work with us to build a custom package suited to your needs.	Need more than just a great Operator? Our Site Supervisors have at least their Certificate III qualification plus 10 or more years of experience on treatment plants. This package also includes full Engineering support from our team.	Do you need a mobile service technician to visit your plant and assist with minor on site works and maintenance? We can provide a plant service technician to assist you and/or to supervise third party contractors. And don't forget - our technicians come with full Engineering support from our team!
