

## *Message from the Executive Director*

I would like to thank everyone that attended the GWRCCC Virtual Spring Policy Series. We covered topics related to funding for fleets, climate solutions, equity, and the impact of vehicle electrification on the grid in DC, Maryland, and Virginia.

GWRCCC hosted a ride and drive and demo of an electric school bus event at DC Public Schools. The U.S. EPA just announced \$500 million for its Clean School Bus Program.

In May, Angela Alsobrooks, Prince George's County Executive issued Executive Order No. 6 on Climate Goals. Many of the local, District and state governments and related agencies are advancing climate and sustainability laws, policies and regulations that will impact the public and private sectors.

GWRCCC hosted an EV Village at the DC DOT Open Streets and Anacostia BID.

Need letters of support or technical assistance for grant funding? GWRCCC often provides letters of support and technical assistance for members and stakeholders that apply for public and private sector grants and funding opportunities. We are available to partner on various grants or serve as a subrecipient too! We can help with your community engagement, grant reporting requirements and project management assistance as well.

We are in very challenging times as country. We pause to remember the lives ended-short to some of the mass shootings that happened in my hometown of Buffalo and in Texas. It is in these moments that we must provide caring, thoughtful, and strong leadership for families, businesses, and communities.

Lastly, I would like to wish everyone a Happy Father's Day and a Happy Juneteenth.

Sincerely,

*Antoine M. Thompson*

Antoine M. Thompson  
Executive Director
