BEYOND THE CLASSROOM: LEARNING ABOUT PATIENT ADVOCACY IN THE FACE OF CONFLICT

APRIL 12, 2024

3 - 4 PM

We will hear from healthcare providers who have had a variety of experiences and expertise having served/worked with patients/populations in areas of conflict in the world. Healthcare in practice is muddy and providers serve on the frontlines caring for patients equitably and compassionately, regardless of any geopolitical, religious and ideological differences. By hearing their about their experiences (that can't be learned from text books) we hope to shift closer to a growth mindset as we prepare future health care providers of the future.
