

Diabetes and Eye Health: A Guide for Primary Care

Jeffrey Gerson, OD, FAAO

This free one-hour webinar will highlight the importance of annual eye exams for patients living with and at risk for diabetes, as well as the need for fostering multidisciplinary collaborative care. In addition, it will discuss how a patient-centered approach to diabetes care includes not only medical care, but also patient education on how diabetes will affect patients' health, including their eye health and vision.
