

Certified Practitioners,

Please remember to update the expiration date of your professional license or certification which makes you eligible to be a licensed practitioner of Early Intervention. If yours expired 6/30/2021, your certification will be made inactive by the system on July 1, 2021.

If you are made inactive, you will need to log on and update your expiration date. Once this is done, notify [David Mills](#). David will need to verify the date and remove the inactive status, restoring the practitioner to active status in the practitioner database.
