

Name! That! Data System!

Can you believe it? It's almost time to bid ta-ta to ITOTS!

After countless fits and starts, Virginia is *on the verge* of implementing a new statewide data system for its Part C early intervention system!

As you may know, this new data system will replace the existing Infant & Toddler Online Tracking System (affectionately known as "ITOTS") and offer a host of features that one could only dream of a few short years ago. The new data system promises to make providing, documenting and billing for early intervention services easier and more efficient than ever.

Given that the "new ITOTS" will be so radically different from the old, many believe a new name is in order....

If you agree: Share your most creative and catchy suggestions with us!

From among suggestions received, finalists selected by the ITCVA state office will be voted on in December. *And...who knows?* The name *you've* suggested might be spoken by hundreds (if not thousands!) of people every day for years to come. *Talk about a legacy!*

RULES AND TIMELINE

1. The ***Name! That! Data System!*** contest begins on Monday, November 1, 2021, and ends at midnight on Tuesday, November 23, 2021.
2. Contest entries will be accepted using the online entry form *only*.
3. An individual may submit multiple entries. However, he/she/they will be included only once in our prize drawing (see 4. below).
4. All participants will be entered into a random drawing to receive a \$50 Amazon gift card. One (1) winner only. *Individuals involved in early intervention administration at the federal or state level will not be included in the drawing.*
5. From among suggestions received, a list of finalists will be compiled, and an opportunity to vote for your favorite(s) will be available December 6-17, 2021.
6. The new statewide data system name will be announced in January 2022.
