

Summer Camp Re-cap

Over the past summer, TTS members had the opportunity to participate in several Science, Technology, Engineering, Arts & Math (S.T.E.A.M.) camps. TRiO Talent Search partnered with **Higher Orbits** to bring students a space-inspired STEAM event. TTS also hosted an **E-Sports/Gaming** camp, taught by ACC instructor Matt Gallarno, where students were given a brief overview of e-sports and career possibilities that align with e-sports, and hosted several **Virtual Coding** camps that taught participants how to customize Minecraft. Camps concluded with **Adventure Academy**, which exposed students to variety of cultural experiences.
