

Colchester Boys Scouts Recycling Project

All three Boy Troops in Colchester (Troops 72, 13, and 109) are participating in recycling plastic bottles, cans and glass bottles. Residents of Colchester can bring their recyclable containers to the Town of Colchester Transfer Station so that the scouts can collect them.

A red shed has been placed on the left as you arrive in front of the entrance gate. You need not enter the transfer area to leave your bags of containers in the red building. The building is located outside the Transfer Station so that residents or even non-residents can access the building at any time, even outside the normal Transfer Station days.

Colchester Boy Scouts thanks all donors who who have left donations in the past and encourage others to join them.
