

Virtual Fundraisers for CHD Research!

In the U.S. a child is born with a congenital heart defect (CHD) approximately every 15 minutes. 2020 has brought new challenges, so we created 15 fundraisers that can be held virtually or with physical distancing, to support you in raising critical research funds. With your help, The Children's Heart Foundation can advance the diagnosis, treatment, and prevention of CHDs by funding the most promising research!
