ProstACT GLOBAL is a Phase III clinical study evaluating TLX591 + Standard of Care (SoC) vs. SoC alone. Your participation could help shape the future of prostate cancer treatment.

Who can join?
- Men 18+ with biopsy-confirmed prostate cancer

- Previously treated with hormone therapy
- Cancer that has spread beyond the prostate
- PSMA-positive disease confirmed via PET scan

Take the next step today: https://www.clinicaltrials.gov/study/NCT06520345
