COGINITI

Unlocking Data Productivity and AI Readiness with Coginiti

Speaker

Chris Coad, Coginiti

Abstract

In just 15 minutes, see how some of the world's most secure and data-intensive organizations have leveraged Coginiti to dramatically boost data team productivity and accelerate time-to-insight. Through real-world use cases, we'll highlight how Coginiti empowers enterprises to improve collaboration, adopt modern technologies like open table formats, and lay the groundwork for AI-driven transformation - helping them save millions of dollars while we're at it. Walk away with practical strategies to make your data operations more agile, efficient, and organized to deliver value.

Biography

Chris Coad

SVP Customer Development
Coginiti

Chris Coad is the Senior Vice President of Customer Development at Coginiti, a leading provider of collaborative data analytics solutions. In this role, he oversees sales, marketing, and account management, driving the company's mission to empower organizations with consistent and efficient data-driven decision-making.

Before joining Coginiti, Chris held various leadership positions across the tech and analytics sectors. He co-founded and served as CEO of Vinsnap, a connected car platform designed to assist automotive dealerships track their service loaner vehicles. His career also includes roles at Ford Motor Company, Accenture, Compete, Inc., and Leapfrog Online, where he focused on client services and account management.

Chris holds a Bachelor of Science in Management from Purdue University and is based in Atlanta, Georgia. Beyond his professional endeavors, he is an entrepreneur, sports enthusiast, and outdoor adventurer.

TAMR

MDM – Faster Better Cheaper

Speaker

Ravi Hulasi, Tamr

Abstract

Master Data Management is not a new discipline, yet so many people come away from their MDM deployment feeling underwhelmed or distracted by unnecessary overhead rather than empowered to improve business results. Tamr is changing the game. Join us for this session where we'll show how companies choosing Tamr's AI-native MDM are happier with a solution that allows data professionals to:

- Configure master data workflows without getting bogged down by rule definition and maintenance (faster)
- Manage a single workflow supporting data mastering, data quality, and data enrichment (cheaper)
- Power enterprise applications with clearer views of mastered entities and the relationships between them (better)

Biography

Ravi Hulasi

Head of Strategic Solutions
Tamr

Ravi Hulasi is the Head of Strategic Solutions at Tamr, where he leads efforts to help organizations unlock the full value of their data through strategic guidance and implementation expertise. He works closely with clients to drive successful adoption and measurable impact from Tamr's data mastering solutions. With over 20 years of experience in enterprise data management and technical leadership, Ravi has a proven track record of developing innovative solutions and bringing cutting-edge products to market on a global scale.

Speaker

James Massa, JPMorganChase

Abstract

TBD

Biography

James Massa

Senior Executive Director of Software Engineering and Architecture
JPMorganChase

James Massa is a recognized leader in data strategy and AI data quality. With six patents, including one for AI Zero Trust Data Quality, he has pioneered innovative solutions that elevate data governance and mitigate risk in AI systems. As the head of Data Quality Application Development for JPMorgan Chase Wealth Management, James led his team to win the 2024 FSTech Award for Best Financial Services IT Team and has been a repeat winner of the American Financial Technology Award for Best Compliance Initiative and the FF Banking Tech Award for Best Reg Tech.

A frequent international conference speaker, James holds master's degrees in Digital Design from Harvard University and in Finance from Baruch College. He is also an AWS Certified Solutions Architect and a former Agile adjunct instructor at NYU. With expertise spanning data quality, data strategy, responsible AI, GenAI, compliance, operations, trading, and program management, James continues to shape industry standards and drive transformative data initiatives.
