

## Creating an iPipeline account to access Thrivent Forms

1. Go directly to <https://formspipe.ipipeline.com/?GAID=7747>
2. Select the option to "Create Account".

3. Be sure to enter a phone number that can receive SMS texts for multi-factor authentication (MFA). MFA will be required every 30 days, beginning 6/20/25.
4. Follow any additional prompts to finish setting up your account.
5. Save the login page <https://formspipe.ipipeline.com/?GAID=7747>, your username and password to a secure password management tool.

**Note:** If you use iPipeline elsewhere, please note that this URL and login are unique to Thrivent's online forms. You cannot log into this instance of Thrivent FormsPipe via another iPipeline instance. All iPipeline access points look similar, but have a different GAID. The correct URL to access Thrivent would end in GAID=7747 (see above). The username iPipeline will generate for you should also end in 7747.

### Tips:

- To more quickly access the forms in the future, we suggest saving the highlighted URL to your browser's Favorites or Bookmarks with an easily identifiable name like "Thrivent Printable Forms".
- All iPipeline URLs are unique. Other login pages will not work for this login, or vice versa.
- For best results, log out of all other instances of iPipeline (including iGO, FormsPipe, etc.) or open this link in a different browser. Multiple open accounts could result in errors.
- eApps *are not available* through FormsPipe. Contact your Thrivent BGA for access to Thrivent's eApp on iGO.
