

Conditions, impairments or considerations that would disqualify a proposed insured from approval

In rare instances, there may be a history indicated for disqualification in this guide that you feel may qualify for a CareMatters® policy. These histories should be prescreened before an application is submitted. Histories not found in this prequalification guide will be given individual consideration. If you feel a history may be borderline for life and long-term care, please complete a prescreen with a CareMatters underwriter prior to submission of an application. For prescreens, call 1-855-381-5729. Include the prescreen reference number in the "Special Instructions Section" of the application, or prescreen via email at CMScreen@nationwide.com. Include a copy of the prescreen email reply with the application.

The proposed insured must be a U.S. citizen or permanent green card holder (issued for 10 years or more) and be able to provide a copy of green card and Social Security/tax identification number card.

Within the last five years, proposed insured has had, has been diagnosed as having or has been treated for:

- Alcohol abuse or dependency
- Alzheimer's, dementia, senility, mild cognitive impairment (MCI), organic brain syndrome, memory loss or other cognitive impairment
- ALS (Lou Gehrig's disease)
- Bone marrow disorder, Hodgkin's disease, leukemia or lymphoma
- Cancer of the blood, bone, brain, esophagus, head/neck, liver, lung, kidney, ovary, pancreas, stomach, recurrent cancers (any type excluding basal cell carcinoma) or cancer that has spread to other organs or lymph nodes^{1,2}
- Cardiomyopathy
- Cerebral palsy
- Cirrhosis of the liver
- Cystic fibrosis
- Diabetes type 1
- Down syndrome
- Drug abuse or dependency; controlled substance, illegal or prescription drugs
- Emphysema or other lung disorder requiring regular or intermittent use of oxygen
- HIV positive, AIDS, ARC, severe combined immunodeficiency, common variable immune deficiency
- Huntington's disease or has/had immediate family member with Huntington's disease
- Hydrocephalus with or without shunt placement
- Imbalance, unsteady gait or ataxia
- Mental retardation
- Multiple sclerosis, including relapsing-remitting disease
- Muscular dystrophy
- Paralysis, hemiplegia, paraplegia or quadriplegia (excluding Bell's palsy)
- Parkinson's disease
- Post-polio syndrome
- Organ transplant (other than cornea)
- Renal failure, chronic kidney disease (excludes kidney stones)
- Schizophrenia, paranoia, bipolar disease or any psychiatric disorders with psychosis
- Steroid-dependent condition (six months or longer)
- Stroke/cerebrovascular accident (CVA)
- Suicide attempt or ideation
- Transient ischemic attack (TIA)

Impairments and conditions that would not be insurable:

Durable medical items

Currently use or have used in the last 24 months:

- Catheter
- Chairlift or stair lift
- Colostomy or urostomy bag
- Dialysis
- Feeding tube
- Hospital bed
- Hover lift
- Implantable defibrillator
- Motorized scooter
- Multi-point cane
- Oxygen equipment
- PICC line (subclavian catheter)
- Respirator or ventilator
- Walker or wheelchair

ADL impairments

Currently need or any need in the last 24 months for assistance or supervision of any of the following activities:

- Bathing
- Bowel or bladder control
- Dressing
- Eating
- Moving in or out of a chair or bed
- Taking medications, including setup of medications
- Toileting
- Walking

Medical services

Currently reside in, have used within the past 24 months, been recommended or planning to utilize:

- Adult day care services
- Assisted living care facility
- Home health care services
- Hospice
- Nursing home
- Retirement community with long-term care (LTC) services received
- Other custodial facility
- Other caregiver support

Build chart

This is a guide and is not all inclusive — a body mass index (BMI) of less than 17 or greater than 40 is not acceptable.

- Those builds with BMI between 17 and 40 may also be unacceptable depending on co-morbid conditions. Below is a sample build chart based on height and weight:

Height (inches)	Body weight (pounds)			
	Decline	Marginal ³	Decline	Decline
60	87	169	199	205
64	99	192	227	233
67	109	211	249	255
69	115	223	264	270
71	122	237	280	287
72	126	243	288	295
73	130	250	296	303
75	136	263	312	320

Other factors that may not be insurable:

- Currently collecting any type of disability or worker's compensation payments
- Multiple unexplained falls in the past 12 months
- Diagnostic testing planned, scheduled or recommended that has not been completed
- Surgery planned, scheduled or recommended that has not been completed
- Surgery completed, yet not fully recovered for a minimum of three months, including released from physician care for a specific medical condition
- Use of a handicap permit due to physical limitations or medical conditions
- OR any of the following in combination with tobacco usage (cigarettes, pipe or cigar) in the past 36 months:**
 - Cardiac disease, including angina, atrial fibrillation, congestive heart failure, coronary artery bypass or stent, mitral valve disease, tachycardia, aneurysm, heart attack (myocardial infarction), valvular heart disease excluding mitral valve prolapse (MVP), sick sinus syndrome or premature ventricular contractions (PVCs)
- Osteoporosis
- Deep venous thrombosis (DVT) or pulmonary emboli (PE), history of
- Carotid artery disease, cerebral vascular accident (stroke) or TIA
- Peripheral vascular disease
- Diabetes
- Thrombotic disorder or clotting disorder
- Respiratory conditions, including asthma, chronic emphysema, chronic obstructive pulmonary disease, obstructive sleep apnea or pulmonary embolism

¹ If the type of cancer is not listed above, consideration may be possible, provided the cancer is not recurrent. A prescreen should be completed with details of the cancer history, including location, stage, type and date of last treatment.

² Cancer history greater than five years that is high risk and/or advanced stage could also result in a decline. A prescreen should be completed with details of the cancer history, including location, stage, type and date of last treatment.

³ Histories with marginal builds or overweight with co-morbid conditions should have a prescreen completed. Some co-morbid conditions include diabetes, weight-bearing joint and back disorders, sleep apnea, etc.

Considerations regarding current or pending medical treatment:

- If the client has any surgery scheduled in the next six months or has been advised to have surgery, wait to submit the case until the client is at least three months post-operative, fully recovered, back to 100% activity and released from all medical and doctor's care
 - Spinal and back surgeries should not be submitted prior to 12 months from completion of treatment and full recovery
 - Surgeries and/or injection treatment for joint disorders within the last 12 months should have a prescreen completed
- If the client is currently being evaluated for an undiagnosed medical condition, postpone submission until all evaluations have been completed and a diagnosis has been made
- If physical therapy has been completed within the last 12 months, a prescreen should be completed

This medication list may only represent the brand name medication. If the proposed insured is taking a generic medication, the brand name should be verified. If the proposed insured is taking any of the medications below, it will likely disqualify an application from Nationwide YourLife CareMatters, as it may reveal an underlying condition that is not insurable. This list is not all-inclusive. If a proposed insured is on a medication listed below and you feel that the history may develop favorably to meet CareMatters guidelines, a prescreen should be completed before an application is submitted.

Any medication used for the treatment of AIDS/ARC/HIV, any chemotherapy medications (all forms) or medicinal marijuana will be a decline, even if not individually listed in the table below.

Be sure to choose a product that meets long-term life insurance needs, especially if personal situations change — for example, marriage, birth of a child or job promotion. Weigh the costs of the policy, and understand that life insurance has fees and charges that vary with sex, health, age and tobacco use. Riders that customize a policy to fit individual needs usually carry an additional charge.

Benefits under the Acceleration of Life Insurance Death Benefit for Qualified Long-Term Care Services rider are an advance payment of the policy's death benefit while the insured is still living. Accelerating the death benefit, along with loans and withdrawals, reduces both the death benefit and cash surrender value of the policy. Care should be taken to make sure that life insurance needs continue to be met even if the entire death benefit is accelerated or if money is taken from the policy.

Individual care needs and costs will vary, and there is no guarantee the policy will cover the entire cost of the insured's long-term care. Nationwide pays benefits to the policyowner. If the policy is owned by someone other than the insured, there is no guarantee the policyowner will use the benefits to pay for LTC services.

Guarantees are subject to the claims-paying ability of Nationwide Life and Annuity Insurance Company.
