## **PCL Construction Selected for U of M Track & Field**

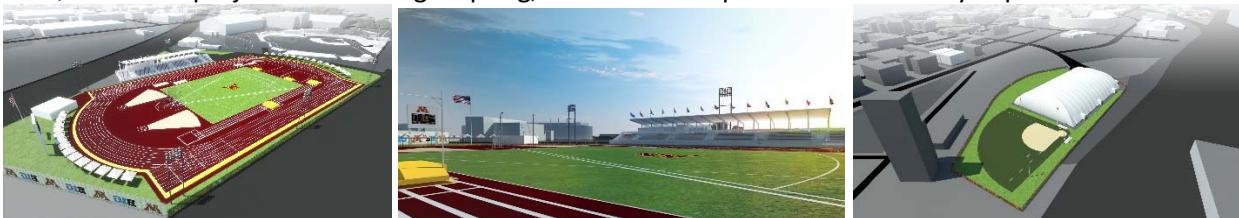

Burnsville, MN (Nov. 1, 2016) – PCL Construction has been selected by the University of Minnesota as design-builder for its new track and field facility, as well as for the relocation of an existing sports dome. PCL's design partner is DLR Group, the same combined team that completed the adjacent Siebert Field baseball stadium.

"We appreciate all of the organizations that took the time to participate in the selection process and we are excited to get to work with PCL and DLR to provide a first-class facility for every student that proudly wears Minnesota on their chest and competes for our track and field programs," said Athletics Director Mark Coyle.

The University has been unable to host outdoor track and field competitions for almost 15 years, due to deteriorating facilities. The new facilities will meet stringent standards required to host Big Ten and NCAA competitions, Minnesota High School meets, and USA Track and Field national marquee events.

"On this project we have the opportunity to perform at the highest level for so many students at the University of Minnesota, both in track and field as well as other programs using the relocated sports dome. These facilities will shape many positive student experiences for years to come. As a construction company, it's the most meaningful work we can engage in," said Mike Headrick, PCL's Vice President and Minneapolis District Manager.

The \$15 million project is set to begin Spring, 2017 with completion scheduled by September 2018.

### **About PCL Construction**

PCL is a group of independent construction companies that carries out work across the United States, Canada, the Caribbean, and in Australia. These diverse operations in the civil infrastructure, heavy industrial, and buildings markets are supported by a strategic presence in 31 major centers. Together, these companies have an annual construction volume of more than \$8 billion, making PCL one of the largest contracting organizations in North America.
