

Men's Sexual Wellness Therapies at BioAge Health

P-shot:

Injection of PRP (or exosomes) for delivery of growth factors to treat erectile dysfunction and increase sensitivity. Can help decrease reliance on erectile medications for severe ED.

Some may notice improvement of size/girth.

With PRP (platelet-rich plasma):
\$1800 (includes pump)

With exosomes (stem-cell derived concentrated growth factors):
\$3800

GAINSWave:

Series of acoustic wave sessions to increase blood flow, increase nitric oxide production in tissues, and stimulate formation of new blood vessels:
\$3000+ (based on severity of ED)

Male penile enhancement:

Placement of HA filler and PRP for reliable increase of penile girth.
Thin, blunt-tip catheters used to ensure safe placement, with acoustic wave treatment to ensure smooth contour.

Filler (up to 5 syringes) + PRP; includes pump: \$4900

Additional filler (up to 5 syringes): \$3500

Scrotox:

non-surgical cosmetic treatment of the scrotum with Botox to decrease painful contractions of the scrotum, decrease sweating, reduce wrinkles, and enhance the cosmetic appearance.
\$650-1200 (up to 100 units)
