

## ***From the Desk of EGSA Technical Oversight Committee Chair, Brian Ponstein***

At the EGSA Spring Conference in New Mexico, the TOC will be reviewing the performance of the current released topics, reviewing topics in development and assigning new topics for 2018. We hope that you have found the released videos and technical articles useful in your professional career. If you have items that you can contribute to the committee, we would appreciate it if you would join our committee meeting.

Note: If you would like to be a part of this group, please make your travel plans to accommodate when the TOC meets. Unlike other committees, the TOC meets before the conference officially begins, meaning arrival at the hotel should be prior to 2pm on Sunday.

The leadership team of the TOC has ideas for 2018, but the committee will be voting on the topics and assigning them to individuals. We welcome anyone who wants to be an active member in this committee, as there are several tasks that need to be done. Once assigned to a topic, you will be a part of the regular meetings for that topic that are typically held monthly.

If you have something to bring up in our meeting, please email me to get your item added to the agenda.
