

Cannabis 101: What You Need to Know But Might Not See

Join us for an engaging, interactive, free event designed to help parents, caregivers, educators and community members better understand today's cannabis landscape.

Cannabis is becoming more common — and often easier to miss than we think. A small group of local community experts will cover:

- Cannabis 101
- How cannabis affects youth brain development
- Signs of increased risk, harm reduction and safety
- Tips for having meaningful conversations with kids

Participants will also have the opportunity to walk through a mock bedroom and identify everyday items that may signal increased risk of use.

Those who attend will leave informed, prepared and better equipped with knowledge that supports safer adult use, open conversations and youth well-being.

Presenters:

- Chief Dave Borchert, New Ulm Police
- Erin Schwab, Health Educator and Planner, Brown Co. Public Health
- Glenn Hauser, owner of Brick Side Growers, Inc.

Brown County
Chemical Health
Action Team

Thursday, March 26, 2026
