

A Look Ahead for the Sacramento Section

Bradley Waldrop, P.E.
Sacramento Section President

As we emerge from COVID, we're stronger in some respects and weaker in others. This year, we turn our focus to strengthening in areas we know need improvement and celebrating what's gone right.

The Sacramento Section has a lot to celebrate! Our Golze Scholarship team has raised an astounding \$159,900 this past year to help students in our area get an amazing education and fortify the industry with much-needed talent.

The events planning team, led by Tayler Kaanan, held a spectacular event at the Sacramento Railroad Museum to honor leaders in our industry. The Section commemorated a historic monument by presenting a plaque to the City of Sacramento.

As we move forward into this next year, we're focused on helping our members get connected to remarkable technical training, vibrant social events, and service opportunities for our community. We are actively recruiting for leadership positions throughout our region, and I encourage you to get involved!

Over this next year, you are going to see more communication about what's happening, what impact you and your peers are making in our community, and how you can share in all the amazing things civil engineers are doing in the Sacramento region.

I'm humbled to be leading a great team of professionals committed to your success and your development in your career. Please follow us online at:
